The committee filled out a chart prepared by Carol indicating the appropriateness of each of eleven possible growth districts.

The following criteria were evaluated: amenities, opportunities, groundwater issues, relation of each district to focus areas, constraints (physical and conservation).

Final selection of the best growth districts to suggest for public discussion will be done at the March 22<sup>nd</sup> meeting.

After a short review of the chart of possible uses in growth districts, it was agreed to work on this March 22<sup>nd</sup>.

Respectfully submitted,
